public sale.

Given under my hand, at the city of Washington, the twenty-third day of May, A. D. 1853.

FRANKLIN PIERCE.

By the President: JOHN WILSON, Commissioner of the General Land Office.

Notice to actual settlers on lands of the United States originally withdrawn from market on account of the railroad grant.

Under act of Congress, approved 3d March, 1853, entitled "An act to extend pre-emption rights to certain lands therein mentioned," the pre-emption laws of the United States as they now exist are extended over the alternate reserved sections of public lands along the line of the railroad therein-before mentioned, where the settlement and improvement were made prior to the final allotment of the alternate sections to the said railroad. Therefore, all claims by pre-emption to any of the alternate sections of public lands within the limits originally reserved will attach, if predicated upon settlements made prior to the 4th February, 1853, the date of the final allotment.

Claims within thesix miles limits must be proven up at any time before the day herein fixed for the commencement of the public sale, and are to be paid for at the rate of two dollars and fifty cents per acre. Claims outside of the six miles, and within the limits of the original reservation, must be proven up prior to the restoration of said lands to private entry.

Soldiers' bounty land warrants, at a dollar and

to private entry.

Soldiers' bounty land warrants, at a dollar and twenty-five cents per acre, may be received in payment for either class of lands; one warrant only, however, can be located by each pre-emptor.

Immediately after the close of the public sale directed by the foregoing proclamation of the Pre sident, applications will be received for the pursident, applications will be received for the purchase at private entry, or location by warrants, of the lands reserved to satisfy this grant, outside of the six miles limits, in such order as to prevent

confusion and insure accuracy, in accordance with instructions to be issued to the registers and re-ceivers. JOHN WILSON, Commissioner of the General Land Office.

NOTICE TO PRE-EMPTION CLAIMANTS. Every person entitled to the right of pre-emp-tion to any of the lands within the townships and

e union. The saies of the article of late years have increased in a ratio that almost exceeds belief. Professor Barry, after a careful examination of his sales-book, finds that the number of bottles de livered to order, in quantities of from half a gross upward, during the year 1852, was within a trifle of 950,000.

It is unnecessary to present at length the evidences of the wonderful properties of the Tricopherous when the public have furnished such an endorsement as this. The cheapness of the article, and the explanations given of its chemical action upon the hair, the scalp, and in all cases of superficial irritation, first recommended it to the attention of the people. This was all that the inventor desired. Every bottle advertised itself. The effects of the fluid exceeded expectation. It acted like a charm. The ladies would not be without it Country dealers in every section of the United States found they must have it; and thus was built up a wholesale trade of an extent hitherto unheard of as regards articles of this kind. The highest point has not yet been reached, and it is believed that the sales this year will be a million and a half of bottles.

It will not be ambitious to commend itself to the people by a blind flattery of their rulers. It will seek public support by the bold avowal of the sentiments which are common to the genuine Democracy of the Union, and by the condemnation of all such as may conflict with them, from whatever quarter they may come. It will seek to be (and it will endeavor to deserve the title) the organ of the Democratic party of the United States.

The Sentinel will maintain, as a fundamental truth of that great party, that the States formed the Union between them by the ratification of the Constitution as a compact; by which also they created the Federal Government, and delegated to it, as their common agent, the powers expressly specified in it, with an explicit reservation of all others to the States, or to their separate governments. The exercise of any powers beyond those thus delegated is therefore an usurpation of the reserved authority of the States by the agent of their own creation.

The Sentinel will uphold and defend the Union upon the basis of the rights of the States—under the Constitution—and thus by sedulously guarding the latter it will the more effectually strengthen and perpetuate the former.

The Bank of England.

One of the singular features attending the influx of gold from California and Australia is the decline in the amount of coin and bullion held by the Bank of England. It is known that the deposits of gold from and Harding and Harding the year 1852 amounted to \$51,000,000 were re-exported from New York to Liverpool, &c., while large sums were transunitted direct from San Francisco to England.

The arrivals of gold, too, from Australia at English ports have been very heavy during the years 1852-3; but in the face of all these additions from various quarters, the amount held by the Bank of England is four millions sterling less now than in July, 1852. The largest sum ever held by the bank at any one period was £22,232.

138. This was on the 10th of July last. This sum has gradually been reduced by exports of bulled to the continent, and of coin to Australia, until now the bank holds only £18,553,905. This is more than enough for the actual or prospective wants of the institution, its active circulation being less than twenty-three millions.

It was near the close of the year 1851 that the Bank of England in August, 1851, and were regular from week to week (with two exceptions only) until March, 1852. Up to that period the increase amounted to \$6,064,968. The additions from this source began in August, 1851, and were regular from week to week (with two exceptions only) until March, 1852. A EUROPEAN WAR would hardly realize the state of things which some of the newspaper commenta-tors seem to take for granted. It would by no means furnish the fine opportunity to European revolu-tionists which is so fondly anticipated by their friends. A continental contest, instead of weak-ening the despotic governments, would render re-volt out of the question. War always unites the ening the despotic governments, would render revolt out of the question. War always unites the people against a foreign foe, and whatever complaints the nations may have against its rulers, they are always forgotten in the national self-love. The people rarely think of such a thing as turning their arms against their own government in the face of an enemy on the outside. European revolutions do not break out when there is a foe at the door. It is in times of profound peace that

CHLOROFORM FOR BEES .- Mr. D. Smith, in a letter to the Edinburgh Courant, thus describes his discovery of "chloroforming bees:" "The quantity of chloroform required for an ordinary hive is 2,993,373

the sixth part of an ounce; a very large live may take nearly a quarter of an ounce. My mode of operation is as follows: I set down a table opposite to, and about four feet distant from, the hive; on the table I spread a thick linen cloth; in the centre of the table I place a small shallow breakfast plate, which I cover with a piece of wire gauze, to prevent the bees coming in immediate contact with the chloroform. I now quietly and cautiously lift the hive from the board on which it is standing, set it down on the top of the table, keeping the plate in the centre; cover the hive closely up 2,993,373 | the sixth part of an ounce; a very large with cloths, and in twenty minutes or so the re not only sound asleep, but, contrary to what I nave seen when they are suncated with supplier, mot one is left among the combs; the whole of them are lying helpless on the table. You now remove what honey you think fit, replace the hive in its old stand, and the bees, as they recover, will return to their domicil. A bright, calm, sunny day is the best; and you should commend operations in the morning, before many of them are abroad."

Novelty.—A new practice is coming into vogue in New Orleans. It is the building of large and elegant verandahs in front of the second stories of buildings, so as to cover the whole breadth but in that case the houses were built over the sidewalk, leaving the basement open for the pavement. A range of fluted columns near the curb-stone supported the outer wall. They are used 3,149,789 tor stores, but the latter are thought to be too 5,615,362 dark. The New Orleans idea is an improvement on this plan, which would allow of a lighter ap-

> NEW BEDFORD OIL MARKET .- The shipping New Bedford Oil. Market.—The shipping list reports the state of the market very quiet the past week—a sale of 60 barrels sperm at 122 cents per gallon; and at Nantucket a sale of 400 barrels delivered as standing at 120 cents. Whale oil has been in active demand—sales 6,000 barrels all for manufacturing, including 1,000 barrels ordinary, at 51 cents; 700 barrels good as it runs, at 511 cents; and 1,200 do. on terms not transpired. A cargo of 2,800 barrels (in Fairhaven) stood at 51; cents cash. Sale of 350 barrels bleached winter oil at 61 cents cash. Whalebone—Sales of 8,000 pounds Polar at 33½, and 9,000 pounds South Sea at 30 cents per pound

CHINESE LANGUAGE. - Who would have thought CHINESE LANGUAGE.—Who would have thought six years ago that the laws of one of the States of the Union would have to be published in English and Chinese, for general circulation? Yet so it is. The ninth section of an act passed by the California Legislature for the collection of the foreign miners' tax has been printed in the Chinese language, for the information of more than thirty thousand Chinese in the new State. Tong k Achich, a Chinaman, certifies that the translation is "faithful and good."—Albany Atlas.
